A small note on how the Fabula feature works

Fabula uses a Neural Network Model that allows users to generate unique, personalized Avatars ("Avatars").

1. Users upload photos and select their gender.
2. Using these data, the Fabula model is retrained to personalize the model.
3. After the model copy is retrained, it generates the avatars.
4. After the Avatars are generated, the uploaded photos are permanently deleted from our servers.
5. We do not use your Personal Data to generally train and/or create our separate artificial intelligence products.
6. After creating the model, users can create Avatars by using the model. The model can be deleted by users in the Application or Fabula Support team or automatically.

1. WHAT INFORMATION DO WE COLLECT?

Personal information you disclose to us

***In Short:** We collect photos and face data to create avatars.*

We collect personal information that you voluntarily provide to us when you register on the Services, express an interest in obtaining information about us or our products and Services, when you participate in activities on the Services, or otherwise when you contact us.

Personal Information Provided by You. The personal information that we collect depends on the context of your interactions with us and the Services, the choices you make, and the products and features you use. The personal information we collect may include the following:

- photos
- gender
- face model
- names
- email addresses
- passwords
- contact or authentication data
- billing addresses
- debit/credit card numbers

Sensitive Information. When necessary, with your consent or as otherwise permitted by applicable law, we process the following categories of sensitive information:

- biometric data
- data about a person's sex life or sexual orientation
- information revealing race or ethnic origin

We collect photos from users that are necessary for the source material for the neural network. As a result of photo processing, the neural network creates a "user face model". It is needed so that the neural network can draw avatars.

User avatars are deleted immediately after the neural network is able to create a face model. The storage time for user photos depends on the queue, ranging from 10 minutes to 90 days. The queue of users for processing depends on the season, demand for the application, and advertising integrations.

Also, the plot neural network has a "user face model", which is removed as a result of three options:

1. When the user deletes the model in the settings on their own or upon request to the support service, the deletion process occurs instantly.
2. By decision of the administration of Fabula, deletion occurs instantly.
3. Automatically, if the user has not used the application for more than 6 months. Storage time is limited to save space.

Please note that the deletion of the Fabula application does not imply the deletion of your account or your data!

Social Media Login Data. We may provide you with the option to register with us using your existing social media account details, like your Facebook, Twitter, or other social media account. If you choose to register in this way, we will collect the information described in the section called 'HOW DO WE HANDLE YOUR SOCIAL LOGINS?' below.

Application Data. If you use our application(s), we also may collect the following information if you choose to provide us with access or permission:

- *Mobile Device Access.* We may request access or permission to certain features from your mobile device, including your mobile device's camera, social media accounts, storage, and other features. If you wish to change our access or permissions, you may do so in your device's settings.
- *Mobile Device Data.* We automatically collect device information (such as your mobile device ID, model, and manufacturer), operating system, version information and system configuration information, device and application identification numbers, browser type and version, hardware model Internet service provider and/or mobile carrier, and Internet Protocol (IP) address (or proxy server). If you are using our application(s), we may also collect information about the phone network associated with your mobile device, your mobile device's operating system or platform, the type of mobile device you use, your mobile device's unique device ID, and information about the features of our application(s) you accessed.
- *Push Notifications.* We may request to send you push notifications regarding your account or certain features of the application(s). If you wish to opt out from receiving these types of communications, you may turn them off in your device's settings.

This information is primarily needed to maintain the security and operation of our application(s), for troubleshooting, and for our internal analytics and reporting purposes.

All personal information that you provide to us must be true, complete, and accurate, and you must notify us of any changes to such personal information.

3. WHAT LEGAL BASES DO WE RELY ON TO PROCESS YOUR INFORMATION?

***In Short:** We only process your personal information when we believe it is necessary and we have a valid legal reason (i.e. legal basis) to do so under applicable law, like with your consent, to comply with laws, to provide you with services to enter into or fulfil our contractual obligations, to protect your rights, or to fulfil our legitimate business interests.*

If you are located in the EU or UK, this section applies to you.

The General Data Protection Regulation (GDPR) and UK GDPR require us to explain the valid legal bases we rely on in order to process your personal information. As such, we may rely on the following legal bases to process your personal information:

- If disclosure is required to comply with a subpoena, warrant, court order, or rules of the court relating to the production of records
- If it was produced by an individual in the course of their employment, business, or profession and the collection is consistent with the purposes for which the information was produced

If you interact with other users of our Services and register for our Services through a social network (such as Facebook), your contacts on the social network will see your name, profile photo, and descriptions of your activity. Similarly, other users will be able to view descriptions of your activity, communicate with you within our Services, and view your profile.

5. WHAT IS OUR STANCE ON THIRD-PARTY WEBSITES?

After creating avatars, third parties (plain servers for neural network training and information storage) automatically delete photos. This is due to ensuring the privacy of users as well as the business case.

We use reasonable and appropriate information security safeguards to help keep the collected information secure and to secure it from accidental loss and unauthorized access, use, alteration, and disclosure. But the transmission of information via the Internet is not completely secure. Although we do our best to protect your collected information, we cannot guarantee the security of the collected information transmitted to or through Fabula AI or an absolute guarantee that such information may not be accessed, disclosed, altered, or destroyed. Any transmission of your collected information is at your own risk. Among others, we utilize the following information security measures:

- Encryption of your Personal Data in transit and at rest.

- All collected information is stored on our secure servers behind firewalls.
- Organizational and legal measures. For example, our employees and employees of our subsidiaries have different levels of access to your Personal data, and only those in charge of data management get access to your Personal Data and only for the limited purposes required for the operation of Fabula. We impose strict liability on such employees for any disclosures, unauthorized accesses, alterations, destructions, or misuse of your Personal Data.
- Conducting periodical data protection impact assessments in order to ensure that the Company fully adheres to the principles of "privacy by design", "privacy by default", and others. We also commit to undertaking a privacy audit in the event of the Company's merger or takeover.

We cannot guarantee the safety and privacy of data you provide to any third parties. Any data collected by third parties is not covered by this privacy notice.
